PROFILE SUMMARY

Frontend-heavy Full Stack Developer with hands-on experience building responsive React applications and scalable backend systems through real-world internships and projects. Skilled in JavaScript, React, REST API integration, PostgreSQL, and building reusable, maintainable software. Strong foundation in data structures, object-oriented programming, debugging, and end-to-end application development, with experience working on AI-assisted workflows and secure role-based platforms.

EDUCATION

Jyothi Engineering College Thrissur, Kerala
Bachelor of Technology - Computer Science Engineering; *Jan 2026 - May 2026*
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Networking, Databases, Cloud Computing

SKILLS SUMMARY

Languages	Java, Python, JavaScript(ES6+), SQL
Frontend	React, Context API, Responsive Web Design, HTML, CSS
Backend	REST API Development, Spring Boot, Django, Flask, FastAPI, Authentication, API Integrations
Databases & Tools	PostgreSQL, MySQL, Database Design, Git, GitHub, Postman, Linux
Core Skills	OOPS, Data Structures & Algorithms, Design Patterns, Debugging, Unit Testing, Problem Solving
Practices	Agile/Scrum, Code Reviews, SDLC, Software Documentation, CI/CD, Cloud Fundamentals

EXPERIENCE

- Army AI Research Center** Bangalore
Role: IIAP Intern *Jan 2026 - Apr 2026*
Responsibilities:
 - Implemented role-based authentication and authorization workflows for secure user access control.
 - Integrated frontend and backend components, ensuring reliable API communication and smooth user workflows.
 - Built reusable UI components and modular backend logic to improve maintainability and development speed.
 - Performed end-to-end feature testing, debugging issues across frontend, backend, and database layers.
 - Developed and tested software features in Java/Python based on functional requirements.
 - Designed and debugged REST APIs for authentication, user workflows, and application data management.
 - Designed PostgreSQL schemas, optimized queries, and implemented backend logic for reliable performance.
 - Built responsive React.js interfaces integrated with backend APIs for seamless application workflows.
 - Documented technical implementations, debugging learnings, and deployment steps for team collaboration.
- theXtruder** Thrissur, Kerala
Role: Software Developer Intern *May 2025 - Jun 2025*
 - Product Showcase UI:** Built React frontend pages for a Qatar-based marble company's product showcase platform.
 - Reusable Components:** Developed reusable React components for product displays, layouts, and structured content sections.
 - Frontend UX:** Improved browsing experience through cleaner layouts, better navigation, and responsive UI design.
- Skolar** Remote
Role: NLP Intern *Oct 2023 - Dec 2025*
 - NLP Pipeline Development:** Built NLP pipelines for sentiment analysis, text preprocessing, and automated analysis of unstructured textual datasets.
 - Text Processing Engineering:** Implemented tokenization, stemming, lemmatization, feature extraction, and model-ready text transformation workflows.
 - Language Model Exploration:** Explored transformer-based language models for contextual text understanding, sentiment classification, and language modeling tasks.

PROJECTS

- Multi-Tenant Jewellery app for the Gold associations**
 - Multi-Tenant Platform:** Built a full-stack B2B platform for associations, companies, members, and advertisers with responsive application workflows.
 - Hierarchical RBAC:** Designed scoped role-based access control for administrators, company users, and members.
 - Marketplace Engine:** Developed tier-based discovery, product search, filtering, wishlist, and enquiry workflows.
 - Market Dashboard:** Built dashboard experiences integrating live market rates, trends, alerts, and backend APIs.
 - Monetization:** Implemented advertising workflows including targeting, approvals, premium placements, impression tracking, and click analytics.

CERTIFICATIONS

- 100 Days of Code, Udemy
- The Complete Data Engineering Bootcamp, Udemy
- Artificial Intelligence and Machine Learning, Skolar

ACHIEVEMENTS

- Solved 500+ LeetCode problems in data structures and algorithms
- Received A Grade at the State-Level Mathematics Fair
