Bangalore, Karnataka

Profile

Full Stack Developer with over 3.5 years of hands-on experience gained through Army internship and practical software development projects, specializing in building scalable applications that handle high volumes of data. Experienced in Django, Node, React and integrating AI models into software applications to enable intelligent, data-driven functionality.

Work Experience

Full Stack Developer

Army AI Research and Incubation center

01/2026 - 06/2026 Bangalore

- **Enterprise Application Development:** Designed and maintained backend modules for a large-scale Data annotation platform for military use.
- **Full Stack Integration:** Developed responsive frontend components using React.js and Bootstrap, ensuring seamless integration with Django backend services.
- **Scalable API Design:** Designed and implemented secure RESTful APIs facilitating data exchange across multiple military commands and units.
- **Performance Optimization:** Wrote and optimized complex PostgreSQL queries to handle large-scale military Image/Video datasets, improving data processing efficiency.
- **AI Model Integration:** Integrated YOLO models into the video annotation workflow to enable automated object detection, accelerate video annotation and minimize manual effort for annotators.
- **Global Collaboration:** Collaborated with senior software engineers at Army Headquarters to implement features, resolve technical issues, and meet evolving project requirements

Frontend Developer Intern

theXtruder

05/2025 - 08/2025 Thrissur

- Designed and developed custom user-facing web components using JavaScript, HTML, CSS.
- Provided proactive debugging support and achieved a 90% no-reopen defect resolution rate.
- Worked in Agile teams to deliver functionality improvements based on client feedback.
- Authored technical documentation and presented issue breakdowns to stakeholders.

Education

Bachelor of Engineering in Computer Science

Jyothi Engineering College

10/2022 - 05/2026 Thrissur

Skills

Backend: Python, Django, FastAPI, Flask, RESTful APIs, SQLAlchemy, Celery

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Responsive UI, REST API Integration

Database: PostgreSQL, MySQL, SQLite, Redis, SQL, Database Design, ORM

Testing: Pytest, unittest, Jest, Postman, API Testing, Integration Testing, Test-Driven Development

DevOps & Cloud: Docker, GitHub Actions, CI/CD, AWS, Linux, Nginx, Render, Environment Configuration

Tools & Practices: Git, GitHub, Jira, VS Code, Agile (Scrum), JSON, YAML, API Documentation, Debugging

Projects

Jewellery Association Digital Platform

- Developed a React Native (Expo) mobile application and web-based admin console to digitize jewellery association operations and centralize industry communication.
- Implemented company-based authentication and hierarchical RBAC across state, association, district, and unit levels for scoped access and region-specific content management.
- Developed a membership-tier marketplace and advertisement management system with regional targeting, approval workflows, scheduled placements, media management, and impression/click tracking.
